Plan and Report Submission Deadlines for Mineral Licence Holders in Mongolia

Nov 4, 2026 · @munkhjargal

Introduction

Each year, licence holders submit three main sets of documents: the mining plan by **1 December**, the exploration and mining annual reports by **15 February** of the following year, and the Environmental Management Plan (EMP) performance report by **1 November**.

This summary is based on Articles 38, 39 and 48 of the Minerals Law of Mongolia and on the Procedure for Developing, Reviewing, Approving and Reporting on Environmental Management Plans, approved by Order A/618 of the Minister of Environment and Tourism (2019). All deadlines were checked against the current official texts.

Abbreviations: ML = Minerals Law; MRPAM = Mineral Resources and Petroleum Authority of Mongolia; EMP = Environmental Management Plan; DEIA = Detailed Environmental Impact Assessment; FS = Feasibility Study.

1. Exploration licence

The exploration work plan is due by 15 April each year, and the annual exploration report by 15 February of the following year.

Document	Deadline	Submit to	Legal basis
Exploration work plan (first year)	Within 30 days of the licence being granted	MRPAM, tax authority	ML 48.1.1
Exploration work plan (later years)	By **15 April** of that year	MRPAM, tax authority	ML 48.1.1
Annual exploration report	By **15 February** of the following year	MRPAM, tax authority	ML 48.1.2
Health and safety report	By **20 January** each year	MRPAM	ML 48.1.3
Report on deposit reserves and exploration results	Before the licence expires, with an expert review	MRPAM (Minerals Professional Council)	ML 48.3

The annual report covers the volume, cost and workforce of all work done (reconnaissance, geophysics, geochemistry, drilling and other work) and its results. It also includes work maps tied to the national geodetic network (ML 48.2).

2. Mining licence

The next year's mining plan is due by 1 December, and the mining report for the current year by 15 February of the following year.

Document	Deadline	Submit to	Legal basis
Feasibility study	Within 1 year of the mining licence being granted	MRPAM (Minerals Professional Council)	ML 48.6.1
Mining plan and main production indicators (next year)	By **1 December** each year	MRPAM	ML 48.6.2
Annual mining report (current year)	By **15 February** of the following year	MRPAM	ML 48.6.3, 48.1.2
Health and safety report	By **20 January** each year	MRPAM	ML 48.7.4, 48.1.3
Royalty report (quarterly)	By the 20th of the first month of the next quarter	Tax authority	ML 48.9
Royalty report (annual)	By **20 January** of the following year	Tax authority	ML 48.9
Public disclosure of sales, taxes and fees paid	Within Q1 of the following year	The public	ML 48.10

The mining report covers mining plan performance, changes in reserves, production, sales, investment and health and safety information (ML 48.7). The same deadlines apply to placer deposit licence holders (ML 48.13).

3. Environmental Management Plan (EMP)

The EMP performance report is due by 1 November. The next year's EMP is prepared in December and approved within Q1.

Document	Deadline	Submit to	Legal basis
Environmental protection plan for exploration	Within 30 days of the licence being granted. The soum governor approves it within 10 days	Soum governor, environmental inspector	ML 38.1.1, 38.2
First annual EMP after a new DEIA	Within 1 month of approval by the expert council	Authority that conducted the general environmental assessment	A/618, 2.2
Next year's EMP (preparation)	Within **December** each year	Authority that conducted the general environmental assessment	A/618, 2.1
Next year's EMP (mines, final approval)	Within **Q1**, aligned with the approved mining plan	Authority that conducted the general environmental assessment	A/618, 2.8, 3.6
EMP for conditionally approved projects	By **31 December** each year	Authority that conducted the general environmental assessment	A/618, 2.5
EMP performance report	By **1 November** each year, at least 3 printed copies plus an electronic copy	Aimag or capital city environment department	A/618, 4.1; ML 39.1.7
Form BOKh-3 (land rehabilitation), pollutant release and transfer register	By **1 November** each year, attached to the performance report	Soum governor's office	A/618, 4.18
On-site assessment of EMP performance	By **30 November**	Working group (with the project implementer present)	A/618, 4.9

Document	Deadline	Submit to	Legal basis
Appeal against the assessment	By **15 December**	Ministry in charge of environment	A/618, 6.4

If EMP performance scores below 90 points, the outstanding work must be completed within Q1 of the following year before the assessment is reissued. This does not apply to incomplete rehabilitation work (A/618, 4.16).

4. Annual calendar

The recurring deadlines are listed in date order. The busiest periods are November to December and January to February.

Deadline	Document	Applies to
20 Jan	Health and safety report	Exploration, mining
20 Jan	Annual royalty report (previous year)	Mining
15 Feb	Annual exploration report (previous year)	Exploration
15 Feb	Annual mining report (previous year)	Mining
31 Mar	Final approval of the current year's EMP (Q1)	Mining
31 Mar	Public disclosure of sales, taxes and fees (Q1)	Mining
15 Apr	Exploration work plan (current year)	Exploration
20 Apr, 20 Jul, 20 Oct	Quarterly royalty report	Mining
1 Nov	**EMP performance report**, Form BOKh-3	Mining (exploration: to be confirmed)
30 Nov	On-site assessment of EMP performance	Mining
1 Dec	**Mining plan** (next year)	Mining
15 Dec	Appeal against the EMP assessment	Mining
December	Preparation of next year's EMP	Mining

Deadline	Document	Applies to
31 Dec	Next year's EMP for conditionally approved projects	Conditionally approved projects

One-time deadlines: the exploration work plan and the environmental protection plan are due within 30 days of the licence being granted. The feasibility study is due within 1 year of the mining licence being granted.

5. Notes

- **Late submission:** If a plan or report is not submitted within the deadlines in ML Article 48, the specialized inspection agency issues a violation notice. A late submission must include that notice and the penalty decision.
- **Electronic submission:** Exploration and mining plans and reports are submitted through the MRPAM online system, following the MRPAM instruction. The EMP checklist and assessment results are entered into the national database within 10 working days of approval (A/618, 5.1).
- **Alignment:** A mine's EMP must be aligned with its approved mining plan. Finalise the EMP after the mining plan (due 1 December) is approved.
- **To be confirmed:** The Minerals Law (38.1.5) sets no date for the annual report on an exploration environmental protection plan. We recommend confirming with the soum environmental inspector whether the 1 November deadline in A/618 applies.
